About This Game

DeathCrank is a fast-paced, local and online multiplayer 3D vehicle combat game that combines the best of games like Twisted Metal and Burnout, with a top-down retro feel. Battle it out in 5 game modes ranging from traditional free-for-all DeathMatch and Capture the Flag, to "Collect the Gears. Physics-based weaponry, environmental hazards, and large amount of viable strategies make this a great battle game for casual parties or hardcore gamers alike. It's total mayhem and a ton of fun. Duke it out in matches of 2 to 8 players, and even mix local and online combatants in our network multiplayer modes.

With more game modes planned and an arsenal of weapons from good 'ol rockets and bombs to crazy game-changing super weapons like the dreaded Black Hole gun, and the diabolically powerful Freeze gun, there's sure to be some high action in every match.

With all the best parts of vehicle combat games of the past with some great new twists, DeathCrank is sure to please.

First one gud but this one just prope gay. I cannot think of another moment in my life that I was closer to passing out from sheer sensory overload. I have never been to church before, but I will be attending this Sunday. Well done.. The only thing i disliked about this game are the controls as they are a little outdated but overall its not that big of a problem and you get used it quickly.

I found myself intrigued by the characters throughout the game always wondering what else i could discover about them and how they may be related to the situation at hand. The game is played in real time and there are many different endings to the game which make it fun to keep rewinding and tackling situations from different angles to see what the outcome may be.

This was my first point and click adventure game and i really liked it!. Avernum IV has a lot of content, non linear questing and free exploring, decent story, better writing, good turn-based combat, simple but immersive world with many little interesting details. The engine has many flaws and I personally prefer previous games controls, world design or even inventories but the change wasn't that bad as some old fans of the series claim.

Avernum IV is probably the weakest or the second weakest game in the Avernum series and still is a pretty good game, wich says a lot. Definitively deserves a try.. Please note this is NOT a review of the content of this DLC, but a warning of a potential issue for people buying this DLC who do not already own the earlier \u2018North London Line Route\u2019 DLC.

Purchasing this DLC will grant your account the \u2018North London & Goblin Lines\u2019 and the Goblin scenarios. Your account will also be granted the older \u2018North London Line Route\u2019 DLC. However you will not have access to the North London Line scenarios which are normally provided with the \u2018North London Line Route\u2019 DLC. And as your account is now flagged as owning \u2018North London Line Route\u2019 you have no way to purchase them even if you wanted to.

If you are affected by the issue you will have to contact Dovetail support at <https://dovetailgames.kayako.com/> for a key to add the North London Line scenarios.

[If you have money to burn, you can purchase the \u2018North London Line Route\u2019 DLC *first*, which should add the route and its scenarios, and *then* purchase this DLC for the Goblin extension and Goblin scenarios. You are effectively paying twice which seems daft and I don\u2019t believe it\u2019s intended, but it\u2019s the only way to avoid the issue. This however doesn\u2019t help people \(like me\) who weren\u2019t aware of this before buying this DLC.](#)

[I have asked Dovetail to let me know when they have resolved the purchase issue and fixed it for existing accounts \u2013 if they do, I will update this post accordingly](#)

[Technical information for those interested. Appid\u2019s can be found at https://steamdb.info/](https://steamdb.info/)

[The purchase of the older DLC - 51894 \u2018Train Simulator: North London Line Route Add-On\u2019 adds the following content:](#)

[258663 Train Simulator: London Overground Class 378 'Capitalstar' EMU Add-On](#)

[325974 Train Simulator: North London Line Route Add-On](#)

[500217 North London Line Content & Manual](#)

[The purchase of this DLC - 114630 \u2018Train Simulator: North London & Goblin Lines Route Add-On\u2019 adds the following content:](#)

[500211 Train Simulator: North London & Goblin Lines Add-On](#)

[258663 Train Simulator: London Overground Class 378 'Capitalstar' EMU Add-On](#)

[325974 Train Simulator: North London Line Route Add-On](#)

[While obviously giving you the newer Goblin package, notably the North London Line Content & Manual is missing, hence the scenarios for the North London Line are not available.](#)

[Steamdb confirms currently the only source of North London Line Content & Manual is through the \u2018Train Simulator:](#)

North London Line Route Add-On 2019. Unfortunately, once you have purchased Train Simulator: North London & Goblin Lines Route Add-On 2019 the older DLC is no longer available to purchase (you are considered to already own it)..
Emmm, it's a no for me. Just a short opinion of mine.

Capcom gave us DLC allowing to play in Raid mode as the sexiest B.O.W in Resident Evil franchise and that is cool. she has her unique animations and quotes which is also cool. Seeing her walking with gun and shooting other Ooze makes completely no sense but at least we have fun, which is cool.

But she is still a paid DLC which is not cool, but if you will find it on discount, it will be worth it.

So if you really like the game, entire franchise or at least Rachel buy it on first possible sale, 9/10.. Funny. Good game :). This game does have a few bugs, primarily with the saving and loading features (Don't overwrite your save!!). But ya'll this game is so worth it! I've been so excited for Love ritual since I stumbled across it and immediately fell in love with the beautiful animation style. It is worth your time 100%!.. Really digging this game. I'm much more into RPGs than side scrollers, but grabbed this one, and for the price, I was actually really surprised. The 3D environments are engaging, the puzzles are challenging, and I had no idea there'd be something of a story there (a small one) and a decent amount of humor as well. I was honestly surprised to find the game this much fun and with a professional presentation (once you get past the intro, and outside of the text presentation, it really presents itself well). I half expected one of those games made with one of those "GameMaker Studio (tm)" games (like Hotline Miami). Naaaaa! Not this one. :)

Never played Isuka before, since the PS2 games really turned me off to the series. I can not find anything annoying about this version. The mechanics are odd, but not bad. It's a simple, but good port. No "HD Remix"ing. My only complaint is that it's missing the...energy? of the original Guilty Gear. \$10 Game? Maybe. Solid \$5 purchase.. This game is insanely difficult. Hardest one in the series. There is actually math involved in this one unlike the other games like hexcells (which I would recommend over this game). If you are up for a challenge, try it out.. Dont waste yur time, its not relaxing. waste of 1.99 really, Destinations is free and killz this.

-Music is butt

-its creepy

-bland and just, no. A Real Must have DLC if you are a Star Conflict junkie like me ^^

Keep up the awesome work and thx for the best online Experience in a long time

. no no no no guys no... the game play is really shoddy. The trailer got me PUMPED until I experienced the clunky controls :V Maybe this concept with Left 4 Dead would be otherworldly! But this game needs serious gameplay attention before I recommend it for its current price tag..... I like the Luxor games, but this one crashed on me on one computer and got corrupted and could never be played again. I couldn't even get it to start on another computer.
