I have some.framework files that I have archived from my project, I want to use those.framework files in another Xcode5 project. Is that possible? Basically, how can I call it from my other project (included.framework files into my project.framework files. I have searched for a while and still haven't found an answer. A: I have found some articles that may be useful, I'm not sure they can help solve your issue entirely though. f678ea9f9e
